Focus on Graphing

61. hydrogen atoms

62. 75 pm, -436 kJ/mol

63. PE as a function of nuclear separation

64. It corresponds to the bond energy.

65. positive

66. Miles's experiment is similar to the PE curve to the right of the minimum. However, to the left, nuclei repel each other, whereas there is no repulsion between opposite poles of magnets.
