DR. SAAB-

YOUR CHEMISTRY 91 CLASS WAS VERY INTERESTING. I HAD NEVER TAKEN A CHEMISTRY CLASS BEFORE SO IT WAS A CHALLENGE FOR ME. I LOVE MATH AND HAD JUST RECENTLY TAKEN ALGEBRA SO IT HELPED ALOT. THE CLASS WAS FUN & I THINK I WOULD TAKE A HIGHER CHEMISTRY CLASS IN THE FUTURE. THANK YOU FOR YOU TIME & EFFORT! I ENJOYED THE CLASS.

Chem 091

Nada Saab

Personally, I actually feared taking chemistry. I never had chemistry. I learned a lot from Professor Saab.

This course was very interesting and was taught a way I could understand it. I no longer fear chemistry and I have Professor Saab to thank.

Chemistry 091  
Teacher: Saab

I enjoyed the class, learned a lot. I felt the teacher did a good job at explaining the assignments. I felt the tests were fair, they ~~were~~ covered the things taught in class. I have no complaints about the work assigned, the test nor the instructor.

This course was very interesting and was taught a way I could understand it. I no longer fear chemistry and I have Professor Saab to thank.

I thought that the preparatory chemistry class was very well taught. The instructor broke down the steps simple enough to explain them to people who've never taken a chemistry class before.

I think this chemistry course was well taught and well explained. I have a hard time with math and the way the formulas & equations were taught made it easy to understand. I enjoyed it.

I feel that I did learn a great deal from this chemistry course. The only problem I see is that perhaps I should have taken a full semester instead of an eight week course. There seems to be a lot to the course that is a little hard to squeeze in given the short amount of time.
